Europe Energy Saving Notice

Energy Saving Matters (EuP 2009/125/EC)

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!

DOCUMENT VERSION

Due to additional product features and/or enhancements, an updated version of this document may be available online.

Please check www.adj.com for the latest revision/update of this manual before beginning installation and/or programming.

GENERAL INFORMATION

INTRODUCTION

Please read and understand the instructions in this manual carefully and thoroughly before attempting to operate this device. These instructions contain important safety and use information.

This product is intended for use by professionally trained personnel only, and is not suitable for private use.

Unpacking

Every device has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton is damaged, carefully inspect the device for damage, and be sure all accessories necessary to install and operate the device have arrived intact. In the event damage has been found or parts are missing, please contact our customer support team for further instructions. Please do not return this device to your dealer without first contacting customer support. Please do not discard the shipping carton in the trash. Please recycle whenever possible.

BOX CONTENTS

Omega Brackets
1.83M locking power cable

IMPORTANT NOTICE!

**THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT.
DO NOT ATTEMPT ANY REPAIRS YOURSELF; DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURER'S WARRANTY AND ARE NOT SUBJECT TO WARRANTY CLAIMS AND/OR REPAIRS.**

LIMITED WARRANTY (USA ONLY)

- A. ADJ Products, LLC hereby warrants, to the original purchaser, ADJ Products, LLC products to be free of manufacturing defects in material and workmanship for a prescribed period from the date of purchase (see specific warranty period on reverse). This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
- B. For warranty service, you must obtain a Return Authorization number (RA#) before sending back the product-please contact ADJ Products, LLC Service Department at 800-322-6337. Send the product only to the ADJ Products, LLC factory. All shipping charges must be pre-paid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, ADJ Products, LLC will pay return shipping charges only to a designated point within the United States. If the entire instrument is sent, it must be shipped in its original package. No accessories should be shipped with the product. If any accessories are shipped with the product, ADJ Products, LLC shall have no liability whatsoever for loss of or damage to any such accessories, or for the safe return thereof.
- C. This warranty is void if the serial number has been altered or removed; if the product is modified in any manner which ADJ Products, LLC concludes, after inspection, affects the reliability of the product, if the product has been repaired or service by anyone other than ADJ Products, LLC factory unless prior written authorization was issued to purchaser by ADJ Products, LLC; if the product is damaged because not properly maintained as set forth in the instruction manual.
- D. This is not a service contract, and this warranty does not include maintenance, cleaning or periodic check up. During the period specified above, ADJ Products, LLC will replace defective parts at its expense with new or refurbished parts, and will absorb all expenses for warrant service and repair labor by reason of defects in material or workmanship. The sole responsibility of ADJ Products, LLC under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of ADJ Products, LLC. All products covered by this warranty were manufactured after August 15, 2012, and bear identifying marks to that effect.
- E. ADJ Products, LLC reserves the right to make changes in design and/or improvements upon its products without any obligation to include these changes in any products theretofore manufactured.
- F. No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with products described above. Except to the extent prohibited by applicable law, all implied warranties made by ADJ Products, LLC in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. And no warranties, whether expressed or implied, including warranties of merchantability or fitness, shall apply to this product after said period has expired. The consumer's and/or Dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall ADJ Products, LLC be liable for any loss or damage, direct or consequential, arising out of the use of, or inability to use, this product.
- G. This warranty is the only written warranty applicable to ADJ Products, LLC Products and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.

LIMITED WARRANTY PERIODS

- **Non L.E.D. Lighting Products = 1-year (365 days) Limited Warranty** (Such as: Special Effect Lighting, Intelligent Lighting, UV lighting, Strobes, Fog Machines, Bubble Machines, Mirror Balls, Par Cans, Trussing, Lighting Stands etc. excluding LED and lamps)
- **Laser Products = 1 Year (365 Days) Limited Warranty** (excludes laser diodes which have 6 month limited warranty)
- **L.E.D. Products = 2-year (730 days) Limited Warranty** (excluding batteries which have a 180 day limited warranty)
Note: 2 Year Warranty only applies to purchases within the United States.
- **StarTec Series = 1 Year Limited Warranty** (excluding batteries which have a 180 day limited warranty)
- **ADJ DMX Controllers = 2 Year (730 Days) Limited Warranty**

SAFETY GUIDELINES

This device is a sophisticated piece of electronic equipment. To guarantee a smooth operation, it is important to follow all instructions and guidelines in this manual. ADJ PRODUCTS, LLC. is not responsible for injury and/or damages resulting from the misuse of this device due to the disregard of the information printed in this manual. Only the original included parts and/or accessories for this device should be used. Any modifications to the device, included and/or accessories will void the original manufactures warranty and increase the risk of damage and/or personal injury.

PROTECTION CLASS 1 - FIXTURE MUST BE PROPERLY GROUNDED

THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT. DO NOT ATTEMPT ANY REPAIRS YOURSELF; DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURER'S WARRANTY AND ARE NOT SUBJECT TO ANY WARRANTY CLAIMS AND/OR REPAIRS.

**DO NOT PLUG FIXTURE INTO A DIMMER PACK!
NEVER OPEN THIS FIXTURE WHILE IN USE!
UNPLUG POWER BEFORE SERVICING FIXTURE!
NEVER TOUCH FIXTURE DURING OPERATION, AS IT MAY BE HOT!
KEEP FLAMMABLE MATERIALS AWAY FROM FIXTURE!**

**NEVER LOOK DIRECTLY INTO THE LIGHT SOURCE!
RETINA INJURY RISK - MAY INDUCE BLINDNESS!
SENSITIVE PERSONS MAY SUFFER AN EPILEPTIC SHOCK!**

**INDOOR / DRY LOCATIONS USE ONLY!
DO NOT EXPOSE FIXTURE TO RAIN AND MOISTURE!**

**MINIMUM DISTANCE TO OBJECTS/SURFACES
MUST BE 39.4 FEET (12 METERS)
MAXIMUM TEMP OF EXTERNAL SURFACE 194°F (90°C)
MINIMUM DISTANCE OF INFLAMMABLE MATERIALS
FROM THE SURFACE 1.6 FEET (0.5 METER)**

WARNING

Minimum distance to lighted objects 12.0 meters.

Maximum temperature of the external surface is 90°C

Minimum distance of inflammable materials from the surface 0.5m.

SAFETY GUIDELINES

HIGH INTENSITY ULTRAVIOLET LIGHT

AVOID DIRECT EYE & SKIN EXPOSURE.
WEAR PROPER EYE & SKIN PROTECTION.
SEE MANUAL FOR SAFETY INSTRUCTIONS.

RISK GROUP 3 - RISK OF EXPOSURE TO ULTRAVIOLET UV RADIATION! THE FIXTURE EMITS A HIGH-INTENSITY WAVELENGTH OF ULTRAVIOLET UV LIGHT FROM THE UV COLOR FILTER. WEAR PROPER EYE AND SKIN PROTECTION. AVOID PROLONGED PERIODS OF EXPOSURE TO THE UV COLOR FILTER. AVOID WEARING WHITE CLOTHING AND/OR USING UV PAINTS ON THE SKIN. AVOID DIRECT EYE AND/OR SKIN EXPOSURE AT DISTANCES LESS THAN 11 FEET (3.3M). DO NOT OPERATE THE FIXTURE WITH DAMAGED/MISSING EXTERNAL COVERS. DO NOT LOOK DIRECTLY INTO THE UV LIGHT AND/OR VIEW UV LIGHT DIRECTLY WITH OPTICAL INSTRUMENTS THAT MAY CONCENTRATE THE LIGHT/RADIATION OUTPUT.

INDIVIDUALS SUFFERING FROM A RANGE OF EYE CONDITIONS, SUNLIGHT EXPOSURE DISORDERS, OR INDIVIDUALS USING PHOTSENSITIVE MEDICATION MAY EXPERIENCE DISCOMFORT IF EXPOSED TO THE ULTRAVIOLET UV LIGHT EMITTED FROM THE UV LED.

DO NOT TOUCH the fixture housing during operation. Turn OFF the power and allow approximately 15-minutes for the fixture to cool down before servicing.

DO NOT shake the fixture; avoid brute force when installing and/or operating the fixture.

DO NOT operate the fixture if the power cord is frayed, crimped, damaged, and/or if any of the power cord connectors are damaged and do not insert into the fixture securely with ease.

NEVER force a power cord connector into the fixture. If the power cord or any of its connectors are damaged, replace it immediately with a new one of a similar power rating.

DO NOT block any air ventilation slots. All fan and air inlets must remain clean and never blocked. Allow approximately 7.9" (20cm) between the fixture and other devices or a wall for proper cooling.

When installing the fixture in a suspended environment, always use mounting hardware that is no less than M10 x 25 mm, and always install the fixture with an appropriately rated safety cable.

Always disconnect the fixture from the main power source before performing any type of service and/or cleaning procedure.

Only handle the power cord by the plug end; never pull out the plug by tugging the wire portion of the cord.

During the initial operation of this fixture, light smoke or a smell may emit from the interior of the fixture. This is a normal process and is caused by excess paint in the interior of the casing burning off from the heat associated with the lamp and will decrease gradually over time.

Consistent operational breaks will ensure the fixture functions properly for many years.

ONLY Use the original packaging and materials to transport the fixture for service.

DISCHARGE LAMP WARNING

This fixture is equipped with a DISCHARGE LAMP, which is highly susceptible to damage if mishandled. NEVER touch the lamp with your bare hands, as the oil from your hands will shorten the lamp's life. NEVER move the fixture until the lamp has had ample time to cool. DISCHARGE LAMPS are NOT covered under warranty conditions. Avoid switching the fixture ON and OFF repeatedly in short intervals, as this will reduce lamp life and intensity. To achieve the intensity associated with discharge lamps, these lamps use gas sealed in a high-pressure environment to emit a brilliant output.

Due to the high pressure involved in the construction of the lamp, it **MAY EXPLODE DURING PROLONGED EXTENSIVE USE**. This risk increases with age; added care is encouraged when dealing with older lamps. Thus, the lamp must always be replaced at the end of its recommended duty cycle. Extreme caution should be used when operating this or any fixture fitted with a gas discharge lamp.

UV RADIATION NOTICE

THIS FIXTURE EMITS INTENSE UV RADIATION, WHICH IS HARMFUL TO THE EYES AND SKIN. THE INTENSE LUMINESCENCE OF THE LAMP CAN CAUSE SEVERE DAMAGE TO THE RETINA. NEVER OPERATE THIS FIXTURE WITH ANY OF THE PROTECTIVE COVERS REMOVED. THESE COVERS HAVE BEEN SPECIALLY DESIGNED TO SHIELD AGAINST UV RADIATION.

LAMP REPLACEMENT

THE LIGHT SOURCE SHOULD ONLY BE REPLACED BY THE MANUFACTURER OR OTHER QUALIFIED SERVICE PERSONNEL! DO NOT PERFORM REPLACEMENT IF YOU ARE NOT QUALIFIED TO DO SO!

USE ONLY GENUINE ORIGINAL PHILIPS™ LAMPS. OTHER BRAND LAMPS WILL CAUSE DAMAGE AND VOID THE FIXTURE WARRANTY!

**DISCONNECT THE MAIN POWER SUPPLY BEFORE REPLACING THE LAMP!
THE FIXTURE MUST COOL FOR 15 MINUTES BEFORE REPLACING THE LAMP!
NEVER TOUCH THE LAMP WITH BARE HANDS; ALWAYS WEAR GLOVES!
OIL FROM HANDS WILL SHORTEN THE LIFE OF THE LAMP!**

MAKE SURE ALL COVERS/FIXTURES ARE REPLACED/SECURED BEFORE OPERATING THE FIXTURE TO PREVENT ANY RISK AND/OR DAMAGE TO THE EYE RETINA FROM UV RADIATION EXPOSURE!

PAN-TILT LOCKS

Before removing lamp, place fixture on a stable flat surface in an **INDOOR DUST FREE** location. Ensure moving head is locked into a right angle position with both **PAN** and **TILT** locks engaged.

LAMP REPLACEMENT

THE LIGHT SOURCE SHOULD ONLY BE REPLACED BY THE MANUFACTURER OR OTHER QUALIFIED SERVICE PERSONNEL! DO NOT PERFORM REPLACEMENT IF YOU ARE NOT QUALIFIED TO DO SO!

Caution: Always replace with the exact same type of lamp and fuse, unless otherwise specified by an authorized ADJ service technician. Replacing with anything other than the specified part can damage your unit and will void your manufacturer's warranty.

Warning: If you continue to blow lamps or fuses, STOP using the unit. Contact customer support for further instructions; you may have to return the unit for servicing. Continuing to use the unit may cause serious damage.

Lamp Replacement: Caution! Never attempt to change the lamp while the fixture is plugged in. Always disconnect the main power and allow the unit ample time to cool before attempting to replace the lamp. Please see page 8 for important information regarding the discharge lamp.

Remove the lamp panel screws located on the rear of the moving head and remove the panel. Loosen the lamp screws and carefully disconnect the lamp.

Lift lamp out of its recess and replace it with an OSRAM SIRIUS HRI® 310W PRO lamp. Reassemble in reverse order.

INSTALLATION GUIDELINES

FLAMMABLE MATERIAL WARNING

Keep the fixture a minimum of 1.6 feet (0.5m) away from flammable materials and/or pyrotechnics.

ELECTRICAL CONNECTIONS

A qualified electrician should handle all electrical connections and/or installations.

USE CAUTION WHEN POWER LINKING OTHER MODEL FIXTURES AS THE POWER CONSUMPTION OF OTHER MODEL FIXTURES MAY EXCEED THE MAXIMUM POWER POUTPUT OF THIS FIXTURE. CHECK THE SILKSCREEN FOR MAXIMUM AMPS.

**MINIMUM DISTANCE TO OBJECTS/SURFACES MUST BE 39.4 FEET (12 METERS).
MINIMUM DISTANCE OF INFLAMMABLE MATERIALS FROM THE SURFACE 1.6 feet (0.5 meters).
MAXIMUM TEMPERATURE OF EXTERNAL SURFACE 194°F (90°C).**

DO NOT INSTALL THE FIXTURE IF YOU ARE NOT QUALIFIED TO DO SO!

The fixture **MUST** be installed following all local, national, and country commercial electrical and construction codes and regulations.

Before rigging/mounting a single fixture or multiple fixtures on any metal truss/structure or placing the fixture(s) on any surface, consult with a professional equipment installer to determine if the metal truss/structure or surface is properly certified to safely hold the combined weight of the fixture(s), clamps, cables, and accessories.

The fixture's ambient operating temperature range is **0° to 104°F (0° to 40°C)**. Do not use the fixture under or above this temperature.

Fixture(s) should be installed in areas outside walking paths, seating areas, or away from areas where unauthorized personnel might reach the fixture by hand.

NEVER stand directly below the fixture(s) when rigging, removing, or servicing.

Overhead fixture installation must always be secured with a secondary safety attachment, such as an appropriately rated safety cable.

The fixture should be positioned so that prolonged staring into the fixture at a distance of 3.088m (10.1 feet) or less is not expected.

Due to the fact that the fixture emits UV light, power supply cables must be UV resistant or fitted with UV resistant protective equipment.

Allow approximately 15 minutes for the fixture to cool down before servicing.

RIGGING

Overhead rigging requires extensive experience, including, among other things, calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.

ALWAYS ATTACH AN APPROPRIATELY RATED SAFETY CABLE (NOT INCLUDED) THAT MEETS ALL LOCAL, NATIONAL, AND COUNTRY CODES AND REGULATIONS WHENEVER INSTALLING THE FIXTURE IN A SUSPENDED ENVIRONMENT!

INSTALLATION GUIDELINES

OMEGA BRACKETS INSTALLATION

Insert the Omega Brackets into the matching holes on the bottom of the fixture. Secure the Omega Brackets to the fixture by turning each quick-lock fastener ¼ turn clockwise; making sure the fastener is completely locked. Omega Brackets can be installed into the fixture base as illustrated below.

SAFETY CABLE

ALWAYS ATTACH A SAFETY WHENEVER INSTALLING THIS FIXTURE IN A SUSPENDED ENVIRONMENT TO ENSURE THE FIXTURE WILL NOT FALL IF THE CLAMP FAILS. CLAMP INSTALLATION

When mounting fixture to truss, be sure to secure an appropriately rated professional grade rigging clamp to the included **Omega Brackets** using an M10 screw fitted through the center hole of the **Omega Brackets**. The fixture provides built-in rigging points for a **SAFETY CABLE** (not included). Be sure to only use one of the designated rigging points for the safety cable and never secure a safety cable to a carrying handle.

INSTALLATION GUIDELINES

RIGGING

Overhead rigging requires extensive experience, including among others, calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.

This fixture is designed to be mounted vertically (hanging or upright), or horizontally (perpendicular to vertical axis) only.

FALLING FIXTURES CAN CAUSE SEVERE INJURY OR SERIOUS EQUIPMENT DAMAGE! FOR THIS REASON, FIXTURES SHOULD BE INSTALLED AND INSPECTED ONLY BY QUALIFIED PERSONNEL. DO NOT INSTALL THE UNIT IF YOU LACK THE QUALIFICATIONS TO DO SO, OR IF YOU HAVE DOUBTS ABOUT THE SAFETY AND SECURITY OF THE INSTALLATION SETUP OR LOCATION!

ALWAYS ATTACH A SAFETY CABLE WHENEVER INSTALLING THIS FIXTURE IN A SUSPENDED ENVIRONMENT TO ENSURE THE FIXTURE WILL NOT FALL IF THE CLAMP FAILS.

INSTALLATION GUIDELINES

POTENTIAL INTERNAL FIXTURE DAMAGE FROM EXTERNAL SOURCES OF LIGHT BEAMS

External sources of light beams from direct sunlight, lighting and moving head fixtures, and lasers, which are focused directly towards the exterior housing and/or penetrate the front lens opening of Elation lighting fixtures, can cause severe internal damage including burning of optics, dichroic color filters, glass and metal gobos, prisms, animation wheels, frost filters, iris, shutters, motors, belts, wiring, discharge lamps, and LEDs.

This issue is not specific only to Elation lighting fixtures, but rather it is a common issue with lighting fixtures from all manufacturers. Although there is no true way to fully prevent this issue from happening, the guidelines below can reduce the risk of potential damage. Contact Elation Service for more details.

DO NOT EXPOSE THE FIXTURE AND/OR FRONT LENS OPENING TO LIGHT BEAMS FROM DIRECT SUNLIGHT, OTHER LIGHTING OR MOVING HEAD FIXTURES, AND LASERS DURING UNPACKING, INSTALLATION, USE, AND EXTENDED IDLE TIMES OUTDOORS. DO NOT FOCUS A LIGHT BEAM FROM ONE LIGHTING FIXTURE DIRECTLY TOWARDS ANOTHER.

SYSTEM MENU

The Vizi Beam CMY features a display screen with a 6-button control pad, which can be used to easily adjust any device settings.

- The **MODE** button cycles through main menu options, or returns to the previous menu without making changes.
- The **ENTER** button is used to select the highlighted option, or to confirm a selection.
- The **UP**, **DOWN**, **LEFT**, and **RIGHT** buttons are used to navigate and adjust menu options and settings displayed on the screen.

SYSTEM MENU

DMX Settings

Select **DMX Settings**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **DMX Address**, **DMX CH Mode**, or **No DMX Status**.

DMX Address — DMX512 address setting

Select **DMX Address**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to adjust address from **001** to **512**, and press **ENTER** button to store.

DMX CH Mode — channel mode

Select **DMX CH Mode**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **20ch** or **24ch**, and press **ENTER** button to store.

No DMX Status — fixture state while DMX single stops

Select **No DMX Status**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Hold Last** (If DMX signal stops, fixture continues to obey the last command it received Via DMX), **Blackout** (fixture blacks-out if DMX signal stops), or **Manual** (If DMX signal stops, fixture returns all channels to the last setting entered manually), and press **ENTER** button to store.

In the **Blackout / Hold Last** state, and with no DMX signal, the unit will remain in the final state for 15M before reverting to static mode. At this time, the lamp and motors will turn-off. When the DMX signal is reconnected, the unit will automatically activate and reset.

Personality

Select **Personality**, and press **ENTER** button to confirm, use **UP/DOWN** buttons to select **Prim/Sec Mode**, **Select Signal**, **Aria Settings**, **Status Settings**, **Reset Motors**, **Display**, or **Service**.

Prim/Sec Mode

Configure unit as either a primary or secondary unit.

Select Signal

Select signal input/output type.

Aria Settings

Enable/disable Aria, and set various parameters related to Aria operation.

Status Settings

Select **Status Settings**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Pan Invert**, **Tilt Invert**, **P/T. Feedback**, **Pan Degree**, **P/T. Speed** or **Hibernation**, and press **ENTER** button to store.

Pan Invert

Select **Pan Invert**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **OFF** (pan invert) or **ON** (normal), and press **ENTER** button to store.

Tilt Invert

Select **Tilt Invert**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **OFF** (tilt invert) or **ON** (normal), and press **ENTER** button to store.

P/T. Feedback

Select **P/T. Feedback**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **OFF** or **ON**, and press **ENTER** button to store.

P/T. Speed

Select **P/T. Speed**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Speed 1**, **Speed 2**, or **Speed 3**, and press **ENTER** button to store.

Hibernation

Select **Hibernation**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **OFF** (unit never go into hibernation mode) or **01M~99M** (Hibernation mode), and press **ENTER** button to store.

SYSTEM MENU

Reset Motors

Select **Reset Motors**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Reset All Motors**, **Pan/Tilt Reset**, **Color Reset**, **Gobo Reset**, **Prism/R-P Reset**, **Shutter Reset**, or **Frost Reset**, and press **ENTER** button to store.

Reset All Motors

Select **Reset All Motors**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **No** or **Yes**, and press **ENTER** button to store. **Pan/Tilt Reset**

Select **Pan/Tilt Reset**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **No** or **Yes**, and press **ENTER** button to store.

Personality (continued)

Color Reset

Select **Color Reset**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **No** or **Yes**, and press **ENTER** button to store.

Gobo Reset

Select **Gobo Reset**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **No** or **Yes**, and press **ENTER** button to store.

Frost Reset

Select **Frost Reset**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **No** or **Yes**, and press **ENTER** button to store.

Prism Reset

Select **Prism/P-R Reset**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **No** or **Yes**, and press **ENTER** button to store.

Display

Select **Display**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Intensity**, **Display Invert**, **Screen Saver Delay**, or **Display Lock ON/OFF**, and press **ENTER** button to store.

Intensity

Select **Intensity**, and press **ENTER** button to confirm. Current mode will blink on the display, Use **UP/ DOWN** buttons to adjust backlight intensity from **001** (dark) to **010** (bright), and press **ENTER** button to store.

Display Invert

Select **Display Invert**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **OFF**, **ON**, or **Auto**, and press **ENTER** button to store.

Screen Saver Delay

Select **Screen Saver Delay**, and press **ENTER** button to confirm. Current mode will blink on the display. Use **UP/DOWN** buttons to adjust backlight intensity from **OFF** or **01M** to **10M**, and press **ENTER** button to store.

Display Lock ON/OFF

Select **Display Lock ON/OFF**, and press **ENTER** button to confirm. Current mode will blink on the display. Use **UP/DOWN** buttons to select **OFF** or **ON**, and press **ENTER** button to store.

Service

Select **Service**, and press **ENTER** button to confirm. Current mode will show on the display, Use **UP/DOWN** button to select **050**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Calibration**, **Color Adjust**, or **Factory Restore**.

When selecting **Calibration**, use **UP/DOWN** buttons to select each parameter, then use **UP** and **DOWN** button to adjust value.

When selecting **Color Adjust**, Use **UP/DOWN** buttons to select each color option, then use **UP** and **DOWN** button to adjust value.

When selecting **Factory Restore**, use **UP/DOWN** buttons to select **NO** or **YES**.

SYSTEM MENU

Manual Control

Select **Manual Control**, and press **ENTER** button to confirm. Current channel will show on the display. Use **UP/DOWN** button to select from the list of adjustable parameters, press **ENTER** button to confirm, then Use **UP/DOWN** button to adjust value **000** to **255**, press **ENTER** button to store, and the fixture will run as the channel value indicates. Press **MENU** button back to the last menu, or exit menu mode idling one minute. (All channels value will become 0 after exiting Manual Test menu)

Lamp Control

Control various lamp control setting, including the manual lamp switch, whether the light turns on automatically when the fixture powers on, and whether the lamp can be switched on or off via DMX control.

Information

Select **Information**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Fixture Life Time**, **Total Lamp Time**, **Fixture Temps**, **Fan Info.(RPM)**, **DMX Values**, **Error Logs**, or **Software Version**.

Fixture Life Time

Select **Fixture Life Time**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Power On Time**, **P-On Time-R**, or **P-On Time Reset**, and press **ENTER** button to store.

Total Lamp Time

Select **Total Lamp Time**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Lamp On Time**, **Lamp On Time-R**, or **Lamp On Time Reset**, and press **ENTER** button to store.

Fixture Temps

Select **Fixture Temps**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Head**, **Base**, **Reset Head Temp**, or **Reset Base Temp** and press **ENTER** button to store.

Fan Info.(RPM)

Select **Fan Info.(RPM)**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **from the list of available fan units** and press **ENTER** button to view the current fan speed.

DMX Values

Select **DMX Values**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select from the list of available parameters, and press **ENTER** button to view the current value.

Error Logs

Select **Error Logs**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Fixture Errors**, or **Reset Error Log**, and press **ENTER** button to store.

Software Version

Select **Software Version**, and press **ENTER** button to confirm. **Software Version** will show on the display. Press **MENU** button to exit.

Lamp Control

Select **Lamp Control**, and press **ENTER** button to confirm. Use **UP/DOWN** buttons to select **Lamp ON/ OFF**, **Lamp On with Power**, **Lamp On via DMX**, or **Lamp Off via DMX**, and press **ENTER** button to store.

DMX SETUP

Power Supply: The ADJ Vizi Beam CMY incorporates an electronic ballast, which automatically senses the voltage when it is plugged into the power source. With the electronic ballast, this unit can be plugged in anywhere.

DMX-512: DMX stands for Digital Multiplex. This is a universal protocol used by most lighting and controller manufacturers as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals found on all DMX fixtures (most controllers only have a DATA “OUT” terminal).

DMX Linking: DMX serves as a language that allows all makes and models from different manufacturers to be linked and operated from a single controller if all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission when using several DMX fixtures, use the shortest cable path possible. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example, a fixture assigned a DMX address of 1 may be placed anywhere in a DMX line—at the beginning, at the end, or anywhere in the middle. Therefore, the first fixture controlled by the controller could be the last fixture in the chain. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is in the DMX chain.

Data Cable (DMX Cable) Requirements (For DMX and Primary/Secondary Operation): The Vizi Beam CMY can be controlled via DMX-512 protocol. It can be either a 10, 12, or 16-channel DMX unit. The DMX address is electronically set using the controls on the front panel of the unit. One’s unit and DMX controller require an approved DMX-512 110 Ohm Data cable for data input and data output (Figure 1). Accu-Cable DMX cables are recommended. If one is making their own cables, be sure to use standard 110-120 Ohm shielded cable (This cable may be purchased at almost all professional sound and lighting stores). Cables should be made with a male and female XLR connector on either end of the cable. Also, remember that DMX cable must be daisy-chained and cannot be split.

Notice: Be sure to follow figures two and three when making one’s own cables. Do not use the ground lug on the XLR connector. Do not connect the cable’s shield conductor to the ground lug or allow the shield conductor to contact the XLR’s outer casing. Grounding the shield could cause a short circuit and erratic behavior.

DMX SETUP

Power Supply: The ADJ Vizi Beam CMY incorporates an electronic ballast, which automatically

Special Note: Line Termination: When using longer runs of cable, one may need to use a terminator on the last unit to avoid erratic behavior. A terminator is a 110-120 ohm 1/4-watt resistor, which connects between pins 2 and 3 of a male XLR connector (DATA + and DATA -). Insert this unit into the female XLR connector of the last unit in one's daisy chain to terminate the line. Using a cable terminator (ADJ part number Z-DMX/T) will decrease the possibilities of erratic behavior.

5-Pin XLR DMX Connectors: Some manufacturers use 5-pin DMX-512 data cables for DATA transmission instead of 3-pin. 5-pin DMX fixtures may be implemented in a 3-pin DMX line. When inserting standard 5-pin data cables into a 3-pin line, use a cable adaptor, readily available at most electric stores. The chart below details a proper cable conversion.

| 3-Pin XLR to 5-Pin XLR Conversion | | |
|-----------------------------------|-------|------------|
| Ground/Shield | Pin 1 | Pin 1 |
| Data Compliment (- signal) | Pin 2 | Pin 2 |
| Data True (+ signal) | Pin 3 | Pin 3 |
| Not Used | | Do Not Use |
| Not Used | | Do Not Use |

| | | 210-229 | No Function |
| | | 230-239 | Reset All |
| | | 240-255 | No Function |

* When color wheel indexing is enabled, the color wheel shall move in increments of 1 so the user can set their desired color split between DMX values 1 and 255.

** When frost indexing is enabled, the frost filter shall move in increments of 1 so the user can get more of a linear frost effect between DMX values 16 and 255.

ERROR CODES

When power is applied, the unit will automatically enter a “**reset/test**” mode. This mode brings all the internal motors to home position. If there is an internal problem with one or more of the motors, an error code will flash in the display in the form of “**XXer**”, where “**XX**” represents a function number. For example, when the display shows “**03Er**,” it means there is an error with the channel 3 motor. If there are multiple errors during the start-up process, they will all flash in the display. For example: if the fixture has errors on channel 1 and channel 3 at the same time, an error message, “**01Er**”, and “**03Er**”, flashes 5 times.

| Error Codes subject to change without notice | | |
|--|--------------------------|---|
| ERROR GROUP | ERROR CODE | DESCRIPTION |
| Encoder Error | Pan Encoder Error | Encoder Error: Pan |
| | Tilt Encoder Error | Encode Error: Tilt |

REMOTE DEVICE MANAGEMENT (RDM)

NOTE: for RDM to work properly, RDM enabled equipment must be used throughout the entire system, including DMX data splitters and wireless systems.

Remote Device Management (RDM) is a protocol that sits on top of the DMX512 data standard for lighting, allowing the DMX systems of the fixtures to be modified and monitored remotely. This protocol is ideal for instances in which a unit is installed in a location that is not easily accessible.

With RDM, the DMX512 system becomes bi-directional, allowing a compatible RDM enabled controller to send out a signal to devices on the wire, as well as allowing the fixture to respond (known as a GET command). The controller can then use its SET command to modify settings that would typically have to be changed or viewed directly via the unit's display screen, including the DMX Address, DMX Channel Mode, and Temperature Sensors.

FIXTURE RDM INFORMATION:

| RDM Code | Device ID | Device Model ID | Personality ID |
|----------|---------------------|-----------------|---------------------|
| 0x1900 | Generated by MCU ID | 0x0102 | 20CH(1) 24CH(2)" |

Please be aware that not all RDM devices support all RDM features, and therefore it is important to check beforehand to ensure that the equipment that you are considering includes all of the features that you require.

The following parameters are accessible in RDM on this device:

| Parameter ID | Code |
|-----------------------------|--------|
| DISC_UNIQUE_BRANCH | 0x0001 |
| DISC_MUTE | 0x0002 |
| DISC_UN_MUTE | 0x0003 |

MAINTENANCE GUIDELINES

DISCONNECT POWER BEFORE PERFORMING ANY MAINTENANCE!

FUZE REPLACEMENT

Locate and remove the unit's power cord. Once the cord has been removed, locate the fuse holder inside the power socket. Insert a flat-head screw driver into the power socket, and gently pry out the fuse holder. Remove the bad fuse, and replace with a new one. The fuse holder has a built-in socket for a spare fuse be sure not to confuse the spare fuse with active fuse.

CLEANING

Frequent cleaning is recommended to ensure proper function, optimized light output, and an extended life. The frequency of cleaning depends on the environment in which the fixture operates: damp, smoky, or particularly dirty environments can cause greater accumulation of dirt on the fixture's optics. Clean the external lens surface periodically with a soft cloth to avoid dirt/debris accumulation.

NEVER use alcohol, solvents, or ammonia-based cleaners.

MAINTENANCE

Regular inspections are recommended to ensure proper function and extended life.

There are no user serviceable parts inside this fixture, please refer all other service issues to an authorized ADJ service technician. Should you need any spare parts, please order genuine parts from your local ADJ dealer.

Please refer to the following points during routine inspections:

- A detailed electrical check by an approved electrical engineer every three months, to make sure the circuit contacts are in good condition in order to prevent overheating.
- Be sure all screws and fasteners are securely tightened at all times. Loose screws may fall out during normal operation, resulting in damage or injury as larger parts could fall.
- Check for any deformations on the housing, color lenses, rigging hardware, and rigging points (ceiling, suspension, trussing). Deformations in the housing could allow for dust or liquids to enter into the fixture. Damaged rigging points or unsecured rigging could cause fixture to fall and seriously injure a person(s).
- Electric power supply cables must not show any damage, material fatigue, or sediments.
- **NEVER** remove the ground prong from the power cable.

SPECIFICATIONS

Light Source:

OSRAM Sirius HRI 310W PRO Discharge Lamp
(6,000 hr.)

Color temperature: 7850K (+/- 500K)

CRI: 86 (+/- 5)

Features:

CMY Color Mixing

On-Board Wireless DMX

Motorized Focus + 16-bit fine focus

2-degree beam angle

Frost Filter to create wash effect

High quality glass lens

2 Rotating prisms

0-100% smooth dimming

Pan/Tilt locks

Various strobe speeds

OTA, wireless, firmware updates

Fan cooled

Color Wheel:

14 dichroic colors + white (Includes CTO (3200K),
CTB (9000k) & UV)

Indexable color wheel for split colors

Separate Multi-Color Effect

GOBO Wheel:

17 static GOBOs + open (4 GOBOs are beam
reducers)

GOBO Shake Effect

Prism Wheels:

2 Rotating prisms

16 facet circular and 6 facet linear prisms

Prisms Overlay

Control:

Protocols: DMX512 & RDM

Control Mode: DMX512 & Manual (On-board
Controls)

2 DMX Channel Modes: 20/24 Channels

Aria X2 Wireless Management / DMX System

Color LCD display with 4-button function menu

0-100% smooth dimming

Various strobe speeds

With Wired Digital Communication Network

Pan/Tilt:

Pan: 540 degrees (plus 16-bit fine pan)

Tilt: 270 degrees (plus 16-bit fine tilt)

3 Phase, High Speed, Pan/Tilt motors

Connections:

DMX Connections: 5-pin DMX In/Out (Data link
max: 32 fixtures)

Power Connections: Outdoor locking In/Out
connections to daisy chain power

Electrical:

Multi-voltage operation: 100-240V, 50/60Hz

Max power consumption: 410W (@120V), 390W
(@230V)

Fuse Protected: 6.5A

Dimensions & Weight:

Dimension: 9.8" (L) x 14.3" (W) x 21.1" (H) / 248 x
364 x 536mm

Weight: 41.2 lbs. / 18.7 kg.

Approvals / Ratings

CE, cETLus (Control # 5028947), FCC

Included:

2x Omega Brackets (107 Type)

2M, outdoor locking 14AWG power cord

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RADIO FREQUENCY INTERFERENCE WARNINGS & INSTRUCTIONS

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Energy Saving Matters (EuP 2009/125/EC)

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!
